Machinery

The bearings in an engine are its most important part. A fast moving train with a hot box may cost a hundred lives. A Bank is the bearing in all business machines. It carries the load. If it is a good bearing the machine runs smoothly—if it is a poor bearing the machine may wreck itself. Did you ever think of this in connection with a Bank?

The First National Bank contains the most modern mechanical equipment known. The officers at its head are among the best men in the community. The system of Banking employed is the most modern known. The Bank—a bearing in El Paso's big business machine—carries its load so silently and smoothly that you never hear anything about it. This is a good sign.

Drop in and see us sometime—it will interest you. Men and women in every walk of life meet in our lobby to exchange ideas. The place is like a great bee-hive in the morning sunshine. Out of the Bank, each day, thousands of satisfied customers. Are you one of them? If not, why not?
